The Story Plot: *Eden Family Enjoys Grandkids*

Eden family story: facing climate change through generations.

Values: *Wants to enjoy grandchildren.*

Conflicts: *Grandchildren will not want or be able to visit.*

Resolutions: *Stay as long as attractive to grandchildren, then move. The property is not an investment.*

What:

Grandchildren visit / Flooding increasing.

Where:

Troy Beach.

Who:

Grandparents/ Grandchildren.

When:

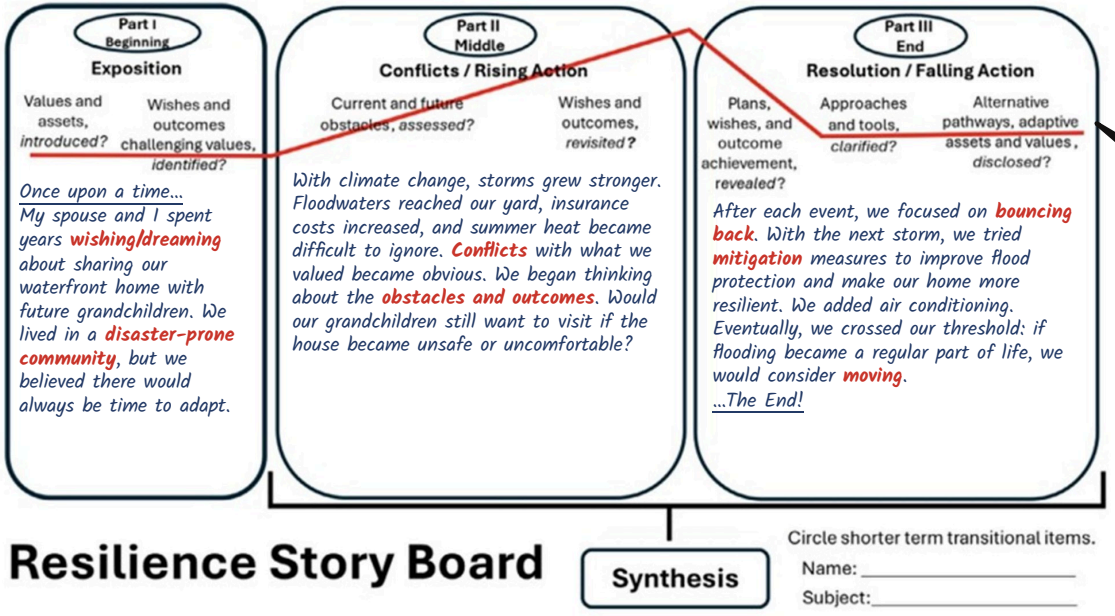

Threshold crossed. Less attractive to children.

Why:

Increased risk.

How:

Aging children/climate change.

Plot Action: Rising/Lowering

Epilogue: *We lived through Hurricane Apollo and subsequent flooding events, reducing vulnerabilities where practical after each disaster. We established risk tolerance thresholds: if floodwaters surrounded our home monthly or summer temperatures regularly reached 110°F, we would move. Fortunately, our grandchildren enjoyed Troy Beach throughout their childhood before either threshold was crossed. When the time came, we gifted our property to the City and moved in with our children.*
